25X1

On 13 May 1954, preliminary work for soil tests was started in an area about 10 km west of Querfurt under the supervision of Senior Lieutenant Roth of the VPL construction staff in Cottbus. Roth had previously been erroneously reported as lieutenant. The soil tests were scheduled to be started in June 1954. Source believed that a new airfield was to be built, but apparently no surveying work had thus far been started.

25X1

Comment. The construction project for a new airfield near Querfurt has previously been reported  . Allegedly, the airfield will be provided with a runway about 2,000 meters long. For detail sketch of area in which the new airfield is scheduled to be built, see Annex. The detail sketch is taken from Map GSGS 4414, sheet 4634. The area is about 10 km west of Querfurt and about 3 km north of Landgrafroda.
